Agile Team Charter - PC REVIVAL

1. Team Purpose & Vision

Objectives:

The primary objective of the team is to conceptualize and develop PC Revival, a business solution aimed at addressing the challenges faced by university students in accessing reliable and affordable laptop repair and upgrade services.

This project focuses on identifying key issues within the CPUT student community through structured data collection and analysis, and using these insights to design a practical and relevant service offering.

The team aims to produce a well-researched and coherent project that clearly demonstrates the problem, validates it with evidence, and presents a feasible solution aligned with the needs of the target market.

Team mission:

To establish PC Revival as a trusted on-campus laptop repair and upgrade service that becomes an essential support system for CPUT students. The vision is to create a service where students can confidently access affordable, reliable, and professional technical assistance without the risks of scams, long travel distances, or financial strain.

Through this initiative, we aim to ensure that every student, regardless of background or financial situation, has continuous access to a functional and efficient laptop that supports uninterrupted learning, improved academic performance, and overall success within their studies.

- **Success definition:**
  We are successful when:

  - We clearly identify challenges faced within the CPUT community regarding laptop repairs and upgrades through data collection(such as surveys)
  - We deliver all project components on time and meet all the required standards
  - Our service is affordable, accessible, and trustworthy for all users

- The team works effectively using Agile principles and collaborations

- **Product / Service:**

The team is responsible for developing *PC Revival*, an on-campus service concept that includes:

- Laptop repair services (hardware and software)
- Upgrade services (e.g., RAM, storage improvements)
- Refurbished laptops at student-friendly prices

The focus is on designing a solution that is accessible, affordable, and relevant to the needs of CPUT students.

2. Team Members & Roles

Who is on the team, and how do we contribute?

Name	Role	Key Responsibilities
Kyle Marais	Project Manager (Team Lead)	Responsible for overseeing the progress of the project, coordinating team activities, and ensuring goals are met
Luxolo Matshikiza	Researcher	Responsible for gathering and conducting data through surveys
Vumbhoni Clifford Mnisi	Writer/editor	Responsible for documentation, reports, and ensuring that all content created
Mbasa Mcakumba	Presenter	Responsible for handling the presentations and communication of project outcomes
Snothando Mangaliso	Designer	Responsible for the branding, visuals, and design elements pertaining to the project
Siyamthanda Mnyabiso	Researcher assistant	Responsible for assisting with research through data collection and ensuring that the collected data is accurate and insightful
Ayabonga Jervasio Yawa	Designer assistant	Responsible for assisting with the design related tasks, e.g. layout support and brand refinement to ensure professional presentation

3. Ways of Working

The team works in short iterations, continuously improving based on feedback and reflecting after completing each milestone.

3.1 Agile Framework

- ☐ Kanban – Trello tool

The team will use a Kanban approach via Trello to manage tasks, track progress, and ensure transparency. Tasks will move through stages such as To Do, In Progress, and Completed.

3.2 Agile Principles

The team will be making use and following the following key Agile principles

- Delivering value to customers early, effectively and continuously
- Embracing change, at all steps of the project
- Encouraging frequent communication and constructive feedback
- Promoting teamwork
- Putting more emphasis on working solutions over excessive documentation

3.3 Ceremonies

Ceremony	Frequency	Purpose
Planning Meeting	Weekly / start of each phase	To define tasks such as survey design, data collection, and report writing; ensure everyone understands their responsibilities
Progress Check-ins (Stand-ups)	2–3 times per week	To share progress on tasks like survey distribution, analysis, and report writing, and identify any blockers
Review / Demo	At the end of each major section	To review completed work, such as survey results, analysis findings, and draft report sections
Retrospective	After major milestones (e.g., survey completion, report draft)	To reflect on teamwork, identify challenges, and improve collaboration for the next phase

4. Working Agreements

- All team members commit to attending meetings and arriving prepared with completed or ongoing tasks.
- Tasks will be completed within agreed timeframes to ensure the project stays on track.
- Communication will remain respectful, clear, and constructive at all times.
- Team members are expected to raise blockers or challenges early to avoid delays in project progress.
- Each member takes responsibility for their assigned role and contributes fairly to the project.
- Feedback is given constructively and used to improve the quality of the work.
- The team commits to continuous improvement through reflection after key milestones.

Accountability:

- Each member is responsible for completing their assigned tasks
- Missed deadlines must be communicated early
- The team leader monitors programs and ensures alignment

5. Communication

Communication Methods

- **WhatsApp (Primary Tool):**
  Used for daily communication, coordinating meetings, sharing updates, and quick decision-making. Most team discussions and progress check-ins take place here.
- **Face-to-Face Meetings:**
  Used for important discussions such as planning, reviewing progress, and aligning on project direction.
- **Google Docs:**
  Used for creating, sharing, and editing project documents collaboratively.
- **Email (Secondary):**
  Used when formal communication or submission of documents is required.

Frequency of Communication

- Daily communication occurs through WhatsApp
- Team meetings are held **2–3 times per week**
- Additional discussions are arranged when necessary, especially during key project stages (e.g. data collection, report completion)

Response Expectations

- Team members are expected to respond to WhatsApp messages within a reasonable time
- Urgent matters should be acknowledged as soon as possible to avoid delays

Goals and Milestones

- **Set SMART Goals:**
  - **Specific:** To identify and analyse the challenges faced by CPUT students regarding laptop repair, affordability, and accessibility, and to use these findings to develop the PC Revival business solution.
  - **Measurable:** To collect a minimum of 20–30 valid survey responses and produce analysed results that support the problem statement and solution.
  - **Achievable:** To complete all required tasks (survey design, data collection, analysis, report writing, and presentation) using available team resources and tools such as WhatsApp, Google Docs, and Trello.
  - **Relevant:** All activities and outputs must directly contribute to developing a practical, student-focused solution (PC Revival) based on real data.
  - **Time-bound:** To complete all phases of the project, including research, analysis, and final submission, within the Term 1 academic deadline.

Milestones:

Milestones	Description	Time
Team Formation & Topic Selection	Establish team and define PC Revival idea	Week 1
Problem Identification	Identify and define student challenges	Week 1–2
Survey Design	Create and finalise survey questions	Week 2
Data Collection	Distribute survey and collect responses	Week 3
Data Analysis	Analyse responses and identify key findings	Week 4
Solution Development	Develop PC Revival concept based on findings	Week 5
Report Compilation	Write and finalise Agile Charter and report	Week 5–6
Final Submission	Submit completed project	End of Term 1

6. Decision-Making

How decisions are made

The team uses a consensus-based decision-making approach, where all members are given the opportunity to contribute their input before a final decision is made. Discussions are held during meetings to evaluate different viewpoints, ensuring that decisions are informed by group agreement and aligned with the project objectives.

Where consensus cannot be reached within a reasonable time, the Team Leader (Project Manager) makes the final decision after considering all team input and ensuring that the decision supports the overall goals of the *PC Revival* project.

Escalation path if the team is stuck

If the team is unable to reach an agreement during discussions:

1. The issue is revisited in a team meeting with all members present
2. Each member presents their viewpoint clearly
3. If disagreement continues, the Team Leader makes the final decision
4. The decision is documented and communicated to all members for alignment

7. Definition of Done (DoD)

When is work really “done”?

- Task requirements are fully completed according to the project brief
- Work is reviewed and agreed upon by all team members
- Survey data is collected and analyzed carefully
- All research data is accurate and relevant
- Graphs, Screenshots attached as evidence
- Documentation is updated
- The team agrees ‘Task’ is done

8. Core Values & Behaviours

How We Treat Each Other:

- Radical Transparency
- Sharing ownership/responsibility
- Consideration and Respect
- Learning mindset
- Constructive peer review

9. Risks & Constraints

What Could Impact Our Success:

- Known risks: Data Backup Management(crucial projects on student PC)
  Safety and Security(susceptible to robberies and loss of assets)
  Trust and Reputation(key to managing trust barrier)

Onboarding Friction(convenience of service to new students)

- Dependencies: CPUT District 6 endorsement
  Supplier Reliability
  Campus Infrastructure

- Constraints:
  Time: Limited project deadlines based on academic schedule
  Budget: No external funding - relies on low-cost solutions
  Tools: Dependent on free tools (Google Docs, Trello, Figma)
  Skills: Limited technical/business experience, learning during the project

10. Review & Improvement

Keeping The Charter Alive

- Charter reviewed every:
  - ☐ Quarter
  - ☐ Release
  - ☑ ~~Retrospective~~
- Last updated: 4 May 2026

11. Team Commitment

Our agreement to this charter

By working on this team, we commit to the principles and agreements outlined above.

Name	**Student Number**	**Signature/Agreement**
Kyle Marais	222727993	K.Marais
Luxolo Matshikiza	219098751	L.M
Vumbhoni Clifford Mnisi	222929456	
Mbasa Mcakumba	241080371	M.Mcakumba
Snothando Mangaliso	241177049	S.Mangaliso
Siyamthanda Mnyabiso	221799028	S.M
Ayabonga Jervasio Yawa	221241558	A.J.Yawa
