PLAN: (ATTACH IMPLEMENTATION PLAN):

Cape Peninsula University of Technology

Work Integrated Learning Plan:

- Duration: 5 months (01 July to 30 November).
- Project Based or Industry Based WIL curricular model implemented.
- Daily stand-up meeting with the team.
- Students are required to complete a monthly attendance register.
- Students are required to complete a monthly report.

Academic Plan:

- Students are registered for the subject of Project Presentation 3.
- Students need to be released for tests in March and September.
- Students need to be released for exams in June and November.

WORK DONE:

1. **Week 1: Onboarding & Integration**

   - Completed all administrative onboarding documentation, compliance forms, and HR orientation.
   - Attended company induction and team meet-and-greet sessions to align with company culture, internal workflows, and team dynamics.

2. **Week 2: Systems Access, Project Allocation & Initial Bug Resolution**

   - Established developer workspace credentials, configured company email, and integrated into the Microsoft Teams communication channels.
   - Onboarded onto the **ATKV** project, performing domain research and code repository analysis to understand the project architecture and requirements.
   - Assigned to bug duty: conducted root-cause investigations, designed solutions, and implemented bug fixes across assigned components.
   - Executed end-to-end testing of fixes across environments, propagating changes from **Local** to **Development**, and deploying to **Staging** for QA review.
   - Performed CI/CD pipeline analysis on failed Pull Request (PR) merges to proactively diagnose build failures and maintain pipeline integrity.
   - Explored AI integration workflows, collaborating with Jev to leverage tools such as **Anthropic**, **Ollama**, and **GroundControl** for accelerating daily tasks.
   - Applied Agile/Scrum methodologies and adhered to company engineering standards and commit policies.

3. **Week 3: Advanced Solution Implementation & AI Workflow Integration**

    - Continued targeted bug investigation and resolution on the **ATKV** project, expanding on the issues identified in Week 2.
    - Implemented, tested, and pushed code fixes through the deployment pipeline (Local → Dev → Staging) for QA validation.
    - Participated in daily Agile standups and sprint sync meetings to report progress, address blockers, and refine task estimations.
    - Expanded technical knowledge of enterprise AI models, refining prompt strategies and integrating AI capabilities (**Anthropic**, **Ollama**, **GroundControl**) into daily debugging, refactoring, and development workflows.
